A Computer Engineering graduate, seeking an opportunity to utilize my potential in building new software and technology with the latest requirements and advancements in the field of technology. Now I am working with **C and T Homecare Services, LLC** a Health Care agency which is a fully New York-based company. I am working here for more than 2 years remotely. Recently I have built there entire WordPress website (www.candthomecare.in) also working as **Payroll Coordinator**. My other responsibility is to checking the timesheets, proceed the payments to more than a thousand Caregivers and Nurses per week in **HHA Exchange** and also communicate with them about their payment related issues over the phone or online platform. I am continuing multitasking works to support this company. I have trained almost 16+ new coordinators in this company. Also I have experience to work as **EVV** (Electronic Visit Verification) coordinator, **INTAKE** coordinator, **Payroll Customer Service Coordinator** etc. **Highly preferred to work as a remote employee.**
